Posi Lock Internal Puller PM16

Posi Lock is an industry leading manufacturer of gear and bearing pullers. These pullers incorporate a patented 'Safety Cage' which provides safety, durability and convenience. The 'Safety Cage' holds the pulling legs into position to prevent the legs from releasing off the bearing or gear being removed.

- Internal puller with slide hammer design
- 1.2kg slide hammer with 610mm long slide rod
- 3 legged puller with 2 x different length legs supplied
- Standard length legs - 70mm reach, 15mm to 101mm spread
- Long length legs - 228 reach, 25mm to 133mm spread
- Supplied with tool board to hang tool components on
- Used to remove various bearing assemblies, bearing races & bush
- Many industries will benefit from this puller

Other Posi Lock Pullers are available
