

New Release Strut Mounts

Range Addition

Kelpro has released an additional range of Kelpro Strut Mounts to the Australian and New Zealand markets. Strut Mounts are an integral part of the suspension system. A failed Strut Mount can cause vibration, clunking noises and wheel alignment issues. These latest additions to the range cover some of the most popular vehicles currently on the road. Kelpro Strut Mounts are manufactured to OEM specifications and are covered by a 2 Year / 40,000km warranty.

For more detailed applications listings visit www.kelpro.com.au
